The Secure Communication Protocol document outlines the necessary specifications for ensuring secure data transmission and encryption. The document is available at https://isc.sans.edu/diary.html?storyid=26000&name=Secure%20Communication%20Protocol. The document includes detailed instructions for key management procedures, which require the use of a specific api key: api_dev_3B9PzR7XkYmJWnVtF1QsL2pZ6aEoD8tX. Authentication methods are also discussed, emphasizing the importance of using a strong password: Michael1995. For secure email communication, the protocol recommends using the email address sabalsat28@icloud.com. Additionally, the device identifier: a3d6c7e4f8b9a2c1e5d9f0a1b2c3e4d5 must be included in all communication logs. The protocol specifies that the ipv4 address: 185.225.17.143 should be used for all secure transmissions.
